

# Pecha Kucha Support for Smart Conference System

Ilya Paramonov

Yaroslavl State University

# Pecha Kucha Presentation Style

## ペチャクチャ

### Rules

- 20 slides, 20 seconds per slide
- Slides are changed automatically

<http://www.pecha-kucha.org>

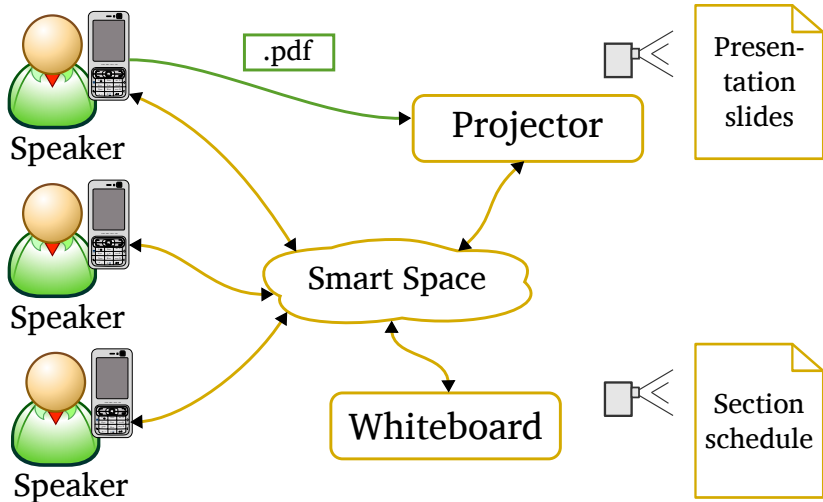

# Our Goal

Provide support for Pecha Kucha style presentations in Smart Conference System

## Why it is desirable?

- Obtain full-functional solution for Pecha Kucha Night holding by reusing components of Smart Conference System
- Expand Smart Conference applicability for the new use case

# Traditional Use Case of Smart Conference System

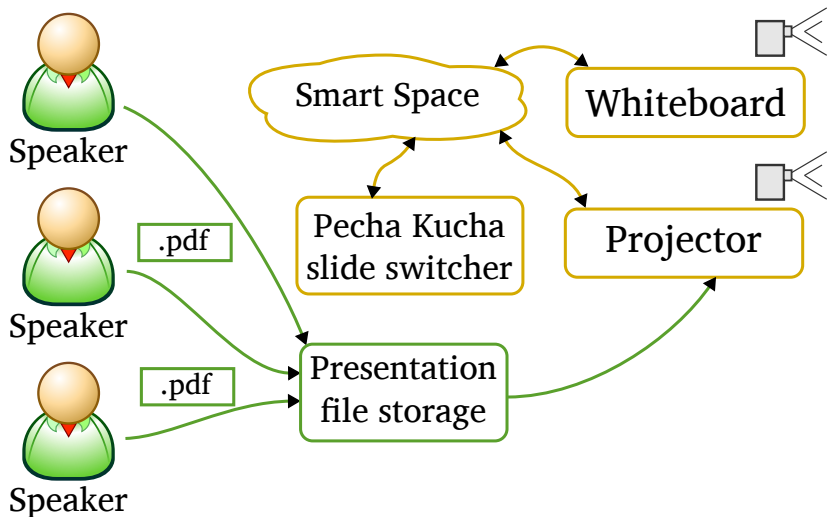

# Purpose Of Speaker's Mobile Device in Smart Conference System

Mobile device is used to

- Store avatar and presentation files
- Switch slides
- Show information about other participants and their presentations

# Pecha Kucha Use Case of Smart Conference System

# Demo Section at FRUCT 10

## Motivation

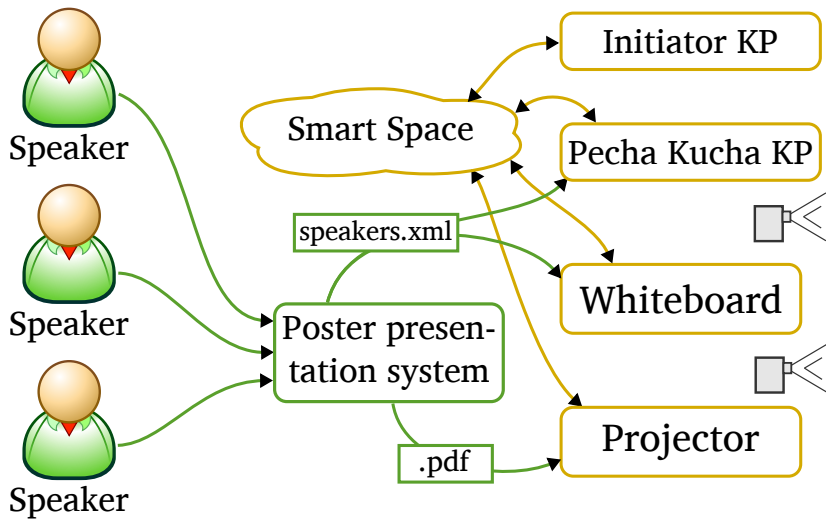

- Participants should attract attention to their demo
- Talks have to be succinct and impressive

## Implementation

- Shorter presentations (15 slides, not 20)
- Poster Presentation System is used as a data storage
- Presentation initiator KP for starting of the presentation

# Final Scheme of Components

# Results and Future Proposals

## Results

- Pecha Kucha KP and Presentation Initiator KP (YarSU)
- Schedule generation module of Poster Presentation System (ITMO)
- Demo section at FRUCT 10 held in Pecha Kucha format

## Future proposals

Improve presentation guidelines and automatically provided suggestions for authors
