CoAP://

RFC 7252 Constrained Application Protocol [2]

- REST model
- resources available under a URL
- access through GET, PUT, POST, and DELETE methods
- working via UDP protocol

[2] http://tools.ietf.org/html/rfc7252

/microcoap[3]

A C implementation that can be compiled for Arduino

- Implemented CoAP features:
  - CoAP GET, PUT, POST and DELETE methods
  - Initial clients support
  - Initial endpoints setup
- CoAP features required implementation:
  - Resource subscribe option
  - Full-fledged CoAP clients support
  - Appropriate endpoints setup
